The HES study

- **Well targeted** – directly addresses a key policy assumption
- **Well executed** – appropriate, high quality design and analysis
- **Timely** – has a chance to influence decisions being taken over next 12 months

Future research challenges

- Norms of energy *service* use
- IHDs and peak use management
- Space heating, gas and IHDs

- Take methods & designs to next level
- Move to scale

- Better use of available research
